Object: Internship at Datadog

Sir,

I am looking for an internship that would start on February 2021 with a length of at least 6 month. I am really motivated to take part of your work as an intern. And i hope that my skills and my motivation will be suited in working with you.

I am an EPITA student, it's a french engineering school. I am motivated to learn new technologies and I am passionate in the IT world. This motivated greatly helped my in achieving my goals. I did deploy some IPSec tunnels in an OpenStack Cloud working as an intern at Orange, the biggest TI company in France. I also created some web applications backend in Go and deployed CI/CD for a web site and a PWA application.

I am looking forward to hearing from you and I thanks you of the time your are spending on me,

Regard,

Tom Moulard
