According to the requirements, design the following pages of Contract Management System:

(1) Register Page and Login Page.

(2) Contract Management Page.

The pages of Draft, Countersign, Finalize, Approve, Sign, etc. Contract Details Page, Contract List Page, Countersign Opinion Page.

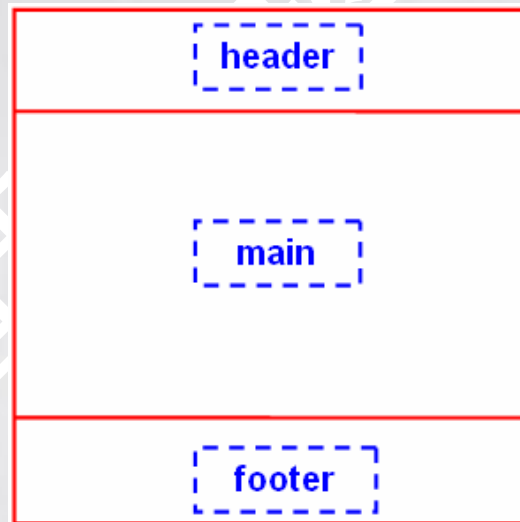

(3) System Management Page.

Assign Contract Page, Permission Management Page, Log Management Page.

First, design the whiteboard diagram, Then, draw and cut the web page sketch.
Finally, generate the static HTML page.

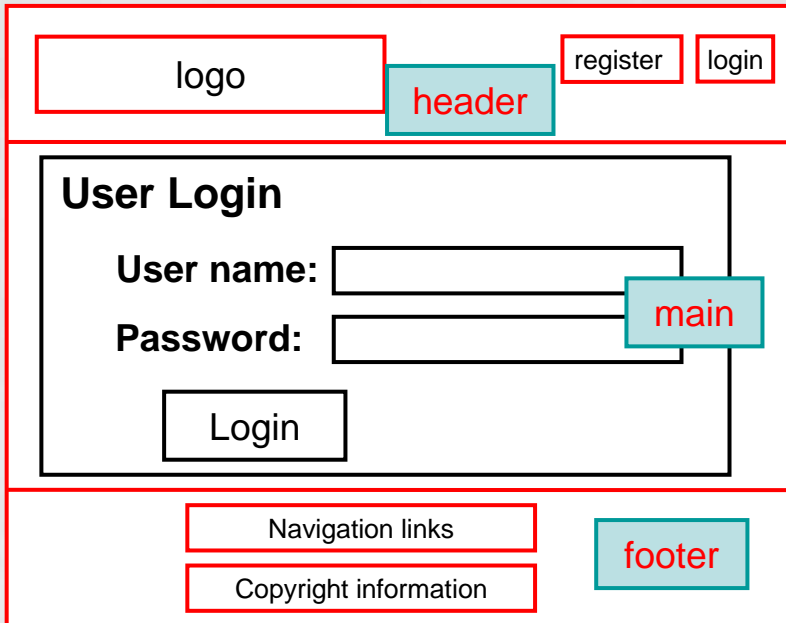

The whole page layout of Contract Management System is implemented in the mode of header, body and footer.

The headers and footers of many pages are the same. They can be extracted out to form individual pages and just referenced on each page.

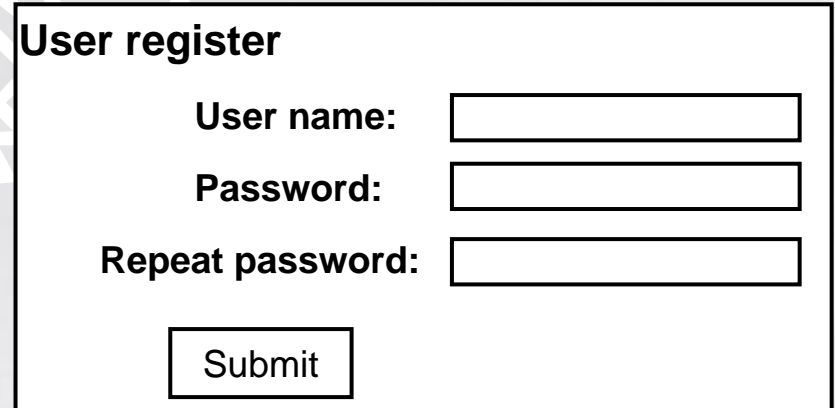

1. Register Page (register.htm)/ Login Page (login.htm)

The body is the corresponding form to receive the register information and login information.

The diagram illustrates the layout of the login.htm page. It is enclosed in a red border and divided into three main sections. The top section, labeled 'header' in a teal box, contains a 'logo' box, a 'register' button, and a 'login' button. The middle section, labeled 'main' in a teal box, is titled 'User Login' and contains a 'User name:' label with a text input field, a 'Password:' label with a text input field, and a 'Login' button. The bottom section, labeled 'footer' in a teal box, contains a 'Navigation links' box and a 'Copyright information' box.

login.htm

The diagram illustrates the layout of the register form. It is enclosed in a black border and contains the following elements: a title 'User register', a 'User name:' label with a text input field, a 'Password:' label with a text input field, a 'Repeat password:' label with a text input field, and a 'Submit' button.

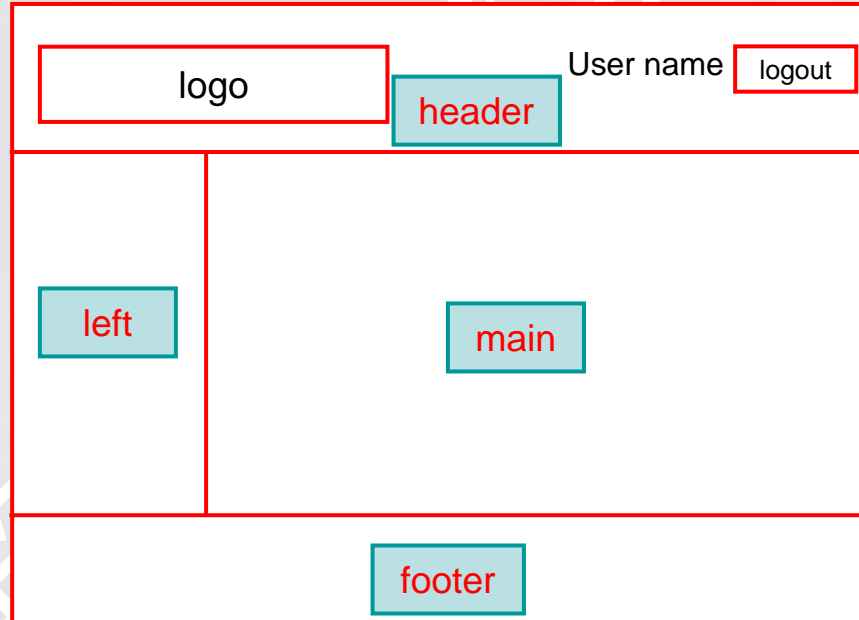

Register Form

2. Management Page ([frame1.htm](#), [frame2.htm](#))

The layout of **Management Page** is implemented with **HTML Frame framework page**.

The body is divided into the left and right.

When the left management hyperlink is clicked, load the corresponding function page in the right.

3. Add Contract Page (addContract.htm)

The body is the contract form. Its layout is implemented with <table>.

Draft Contract	
Contract name:	<input type="text"/>
Customer:	<input type="text"/>
Begin time:	<input type="text"/>
End time:	<input type="text"/>
Content:	<input type="text"/>
Attachment:	<input type="button" value="browse"/>
<input type="button" value="Submit"/> <input type="button" value="Reset"/>	

4. Assign Contract Page (assignOperator.htm)

Receive the people assignment with multi-selection `<select>` control.

Assign operator

Assign countersign operator

operator to be assigned:

lily

jack

>>

<<

assigned operator:

tom

lucy

Assign approver

operator to be assigned:

tom

jack

>>

<<

assigned operator:

lucy

lily

Assign signer

operator to be assigned:

tom

lucy

lily

>>

<<

assigned operator:

jack

Submit

Reset

5. **Contract Details Page (contractDetail.htm)**

It is divided into three parts to display the details of the contract.

<p>Sample contract</p> <p>Customer:jerry Drafter:jack Degin time:2013-12-20 End time:2015-12-20</p> <div>...content</div> <div>Navigation links</div> <div>Copyright information</div>
--

6. To Be Countersigned Contract List Page (dhqhtList.htm)

Display the contract information as list. The contract can be queried according to the condition.

Contract to be countersigned		
Search contract to be countersigned: <input type="text"/> <input type="button" value="search"/>		
Contract name	Draft time	Operation
sales contract	2013-12-21	Countersign
lease contract	2013-12-21	Countersign
labor contract	2013-12-21	Countersign
.....		
<input type="button" value="first"/> <input type="button" value=" < pre"/> <input type="button" value="next >"/> <input type="button" value="last"/>		Total 2 pages 13 records

According to the whiteboard diagrams and sketches, with the webpage technologies of HTML,Table,Form,CSS,Frame, etc, design and generate static HTML pages of the system.

First, design the following pages.

- (1) Register Page register.htm. Login Page login.htm
- (2) Administrator Management Page frame1.htm, Operator Management Page frame2.htm
- (3) Add Contract Page addContract.htm
- (4) Assign Contract Page assignOperator.htm
- (5) Contract Details Page contractDetail.htm
- (6) To Be Countersigned Contract List Page dhqhtList.htm

Then, according to the above pages, design other pages of the system.
